## What is Hospice

*Hospice is not a place but rather a philosophy of care. At the center of hospice and palliative care is the belief that each of us has the right to die pain free and with dignity, and that our families will receive the necessary support.*

*Hospice uses a team-oriented approach to provide medical care, pain management, and emotional and spiritual support expressly tailored to the patient's needs and wishes.*

*Volunteers are integral members of the dedicated team of professionals who provide hospice care. Hospices could not provide the special care they do without these extraordinary individuals who bring companionship to people in the final months and weeks of life, and respite to the families and caregivers. By sharing their time, energy, and expertise, volunteers bring compassion and caring to lives of those in need.*

*National Hospice and Palliative Care Organization*
